The Leaders of Paper at Paperex

CONSUMER CONNECT INITIATIVE

The ultimate global congregation for paper industry

The most awaited exposition of pulp and paper industry to witness the presence of industry stalwarts

Considering digital penetration, the environment is the key area of focus for all industries. However, not everyone is certain about the use and future of paper. Most of us like to follow the trend by including warning in our e-mail signatures, "Think environmental responsibility before printing this mail". But have you thought about paper beyond that?

WHAT IS PAPER?

- Paper is human invention and a wonderful product.
- There is no replacement of paper for its usage in recording, storage and dissemination of important information.

- The specialty paper provides a new printing and packaging option.
- This is a global myth that paper manufacturers use wood as the raw material and cause heavy deforestation, but the reality is:
- Paper industry is not into blatantly cutting the forests

re-planting the reserved forests.

Only 3% of specific types of trees are used for raw material, while over 95% wood is used for fire.

The global paper products market size is expected to grow from \$499.84 billion in 2021 to \$458.8 billion in 2023 at a compound annual

THE GROWING COST OF RAW MATERIAL AND SIGNIFICANT COST INCREASE OF FUELS AND OTHER INPUTS HAVE RESULTED IN AN INCREASE IN DOMESTIC MANUFACTURING

Noida, India: PAPEREX is 'A unified business platform for paper industry for new business opportunities, joint ventures, investments and technology transfer in paper and allied industries. PAPEREX 2022 is committed to break the virtual world and bring together the paper
